SKILLS

- JavaScript / TypeScript
- Node.js / Express
- React / React Native
- MySQL / Supabase
- Socket.io
- Gemini API / AI Integration
- Git / GitHub
- REST APIs

PROFILE

Full-stack developer and problem solver from Tigray, Ethiopia. Designs and builds complete full-stack systems across healthcare, e-commerce, and entertainment sectors — owning architecture, database design, and implementation end to end. Graduated with a 3.74 GPA and Great Distinction. Learns fast, works independently, and uses AI-assisted development to accelerate implementation while retaining full ownership of system design and technical decisions.

PROFESSIONAL EXPERIENCE

- Freelance

Full-Stack Developer & Systems Designer

01/2022 – Present | Ethiopia

Designed and built 4 full-stack applications spanning healthcare, e-commerce, education, and entertainment sectors — owning system architecture, database design, and implementation.

Led technical decisions including role-based access control design, real-time communication architecture (Socket.io), and data-integrity mechanisms.

Used AI-assisted development practices to accelerate implementation speed while independently owning architecture and design choices.

EDUCATION

Diploma in English

Alpha Language School

2016 – 2017 | Mekelle, Ethiopia

BSc Software Engineering

Microlink IT College

08/2025 | Mekelle, Ethiopia

GPA: 3.74/4.0 — Great Distinction

COMMUNITY & LEADERSHIP

Mentor

Guiding female developers through bootcamps and career development.

Mekelle

Volunteer Instructor

Mekelle

Teaching coding skills to underserved youth.

Active member

Active member of open-source collaboration and knowledge-sharing communities.

PROJECTS

Keino Lottery Management Platform

React · Node.js · Socket.io · Supabase · RBAC

Status: Complete — Fully Built, Ready for Deployment

- Built 5 role-based interfaces (admin, cashier, agent, viewer, player) with real-time draw management.
- Implemented real-time communication using Socket.io for live results without page refresh.
- Designed a cryptographic wallet-chaining mechanism (HMAC-SHA256) for transaction integrity.

Luna AI

Women's Health & Cycle Intelligence App | React Native · Expo · Supabase · Gemini API

Status: In Development

- Building a menstrual cycle intelligence app for Ethiopian and African women — mood detection, phase-based health guidance, bilingual AI support.
- Integrating the Gemini API for personalized health recommendations in Amharic and English.

Bank KYC Verification System

System Architecture Design

Status: Complete — Design & Architecture

- Designed identity verification, risk scoring, compliance workflows, and tamper-proof audit logging for a banking KYC use case.

Student Fee Payment & Registration System

HTML/CSS/JS · MySQL · Microservices

Status: Complete — Ready for Deployment

- Built an automated fee payment and registration workflow designed to replace a manual, multi-day process.

Other builds

EthioMarket (e-commerce concept for Ethiopian artisans), MoodNotes (AI emotional wellness concept), CodeCollab (real-time collaborative dev environment), Unfooler Tracker (Instagram bot detector).
